BESI PART NUMBER COMBINATIONS FOR SEAT COVERS AND FOAM

NO. 1	NO. 2	NO. 3	NO. 4 and 5
1. Blue Bird	1. Pre-DOT Lo Back	0. Seat cover	26. Seat size
2. Carpenter	2. Regular Metal Back	2. Velcro	30. Seat size
3. Superior	3. Cushion – 1 st Generation	9. Drivers	39. Seat size
4. Thomas	4. DOT Back – 1 st Generation		45. Seat size
5. Ward/Amtran	5. DOT Back – 2 nd Generation		
6. Wayne	6. Cushion – 2 nd Generation		
	7. New York Hi-Back – 1 st Generation		
	8. Cushion – 3 rd Generation (AmTran)		
	9. New York Hi-Back – 2 nd Generation (AmTran)		

NO. 6	NO. 7 and 8
-0. Regular	See BESI color chart
-1. White welt	
-2. Black welt	
-3. Matching welt	

NO. 9 and 10
“ / ” used when there are two (2) colors in one cover

EXAMPLE OF HOW PART NUMBER WORKS:

64039-011 (6) Wayne, (4) DOT Back 1st Generation, (0) Seat cover, (39) 39”,
 (-0) Regular, (11) Dark green

16039-212 (1) Blue Bird, (6) Cushion 2nd Generation, (0) Seat cover, (39) 39”,
 (-2) Black welt, (12) Green

Break down on part number changes:

MAKE		
Blue Bird	Pre-1979 = 1 st Generation	1979-Present = 2 nd Generation
Carpenter	All backs = 1 st Generation	Pre-1985 cushion = 1 st Generation 1986-Present cushion = 2 nd Generation
Superior	Pre-1978 = 1 st Generation	1979-Present = 2 nd Generation
Thomas	Pre-1982 back = 1 st Generation 1983-Present back = 2 nd Generation	Pre-1977 cushion = 1 st Generation 1978-Present = 2 nd Generation
Ward	Pre-1993 back = 1 st Generation 1993-Present back = 2 nd Generation 1993-Present HB – 2 nd Generation	Pre-1977 cushion = 1 st Generation 1978-1993 cushion = 2 nd Generation 1993-Present cushion = 3 rd Generation
Wayne	Pre-1992 back = 1 st Generation 1993-Present back = 2 nd Generation	Pre-1980 cushion = 1 st Generation 1981-Present cushion = 2 nd Generation

Don't wrestle with conventional seat belts to secure your child's safety seat.

**Try the "Bus Baby Belt" instead!
It's the perfect belt to securely tie down
child safety seats.**

**With twin adjustable tongues, the easy-
to-use "Bus Baby Belt" is the perfect
solution for securing a child safety seat.**

It's the difference you can trust!

MOUNTING BRACKET KITS FOR CROSSING CONTROL ARMS

Proper installation and mounting of crossing arms is essential to provide greater operating efficiency. The applications listed below are the most popular kits which are known to work as they were intended. These kits may, and, in fact, probably do work in other applications. Please consult Specialty Manufacturing Company's Engineering Department if a question arises as to a possible application.

All kits include brackets and mounting hardware necessary for their designed application.

KIT NO.	DRAWING	DESCRIPTION
8300782		Navistar 3000 chassis from 1989 to present. Use with air and vacuum units. Bus must have swept back bumper. Does not include splash shield.
(8041)		Designed for buses using a flat bumper. Typical applications include Ford and Navistar. Can be used with 5-Series, air, or vacuum units.
4322855		Ford B700 from 1984 to present. Bus must have contoured bumper. Can be used on 5-Series, air, or vacuum. Includes splash shield.
4322848		Designed for various model chassis. Can be used for 5-Series, air, and vacuum units. This kit has been used in the past on older model Ford, Chevrolet, GMC, International, and Ford Econoline Van (1980-1991). Includes splash shield for use on IH S1800.
4314357		Chevrolet chassis from 1990 to present. Bus must have contoured bumper. Can be used on 5-Series, air, or vacuum units.
(8047)		Thomas FWD control and pusher buses. This is a Thomas-exclusive kit, but may be usable on other chassis.

MOUNTING BRACKET KITS FOR CROSSING CONTROL ARMS, CONT'D

KIT NO.	DRAWING	DESCRIPTION
4322830		Navistar 3000 from 1990 to present with flexible bumper. Fits 5-Series, air, or vacuum units. This bumper is similar to the standard bumper but has 18" plastic ends designed to break away in the event of a collision. This kit can also be used as an alternate to Kit #8039 on buses with all steel bumpers.
8306672		General Motors Van (Chevy, GMC) from early 1980s to present. Use with 5-Series and vacuum units. This chassis is used for Blue Bird Micro Bird.
8306003		Ford Econoline Vans 1992 to present. Fits 5-Series, air, and vacuum units.

BLUE BIRD RADIO AND PA SYSTEMS BY CUSTOM RADIO

Bus Model & Year	PA System	AM/FM Stereo	AM/FM Stereo PA	AM/FM Stereo Cassette
November 1999 to December 2000	1. Radios were common speakerground. Both left and right speakergrounds were tied together in Pin #5 of the bus harness. The external speakerground was also connected to Pin #5. 2. These vehicles can be upgraded to the high power radios listed from November 1999 to December 2000. However, the speakerground wires in the bus must be separated and positioned correctly in the bus harness for the radio. Refer to wiring diagram supplied with radio for the correct placement of the ground wires in the bus harness. Kit #BKT-BL-0006 contains terminal (pin) with wire to plug into the bus harness.

November 1999 to December 2000	1. Radios were Fixed-Face, Hi-Power with floating speakergrounds. The bus wiring was changed to separate the left, right and external speakerground wires in the bus harness. 2. These radios can be installed in buses built prior to November 1999, but the bus speaker wiring must be changed to separate ground wires for the speakers.

BUS-WATCH® Digital Surveillance

- No tapes required
- Backward compatible with the current analog BUS-WATCH® System
- Real time digital recording - up to 30 frames/60 fields per second
- Ability to download, print and e-mail images
- Adjustable frame rate
- Removable hard drive featuring durable lap-top computer technology (available in 30 and 60 GB)
- Multiple camera capability (up to 4 cameras)

REI

Digital BUS-WATCH® Viewing Station

- Easy-to-use
- Insert removable hard drive into viewing station
- Use to download streaming video or still images to a PC
- View by connecting to PC or TV/Video Monitor
- Software and cables included
- Sturdy steel housing deters vandalism
- Easy installation and connection
- Decoy systems available
- 3" wide x 3" high x 3" deep
- 4mm and 8mm lenses available
- Color and black/white cameras available

REI

BUS-WATCH® Camera

- .1 lux low-light sensitivity
- High-resolution CCD cameras for sharper images
- Electronic iris control
- Sturdy, four-point mounting system
- Built-in condenser microphone
- Sturdy steel housing deters vandalism
- Easy installation and connection
- Decoy systems available
- 3" wide x 3" high x 3" deep
- 4mm and 8mm lenses available
- Color and black/white cameras available

REI

BUS-WATCH® VCR

- Records speed, brakes, turn signals, stop arm and warning lights
- Up to eight hours record time on standard VHS
- Automatic rewind and record
- Delay record for up to 35 minutes after ignition is turned off
- 10 event - 24 hour programmable recording
- Automatic daylight savings time adjustment
- Industrial grade components for durability
- Decoy systems available
- Tamperproof, lockable steel housing
- Built-in heater for temperature control inside the VCR
- Unique slide bracket for quick installation
- Reversible top or bottom mount hardware included
- Engineered specifically for the rugged School Bus Environment

For exact fit step treads for Blue Bird buses, see the appropriate product catalog. All of these step treads have white nosings.

ABRASIVE STRIP adds extra protection against slippage in wet weather!

Students entering and exiting a school bus can be a potentially dangerous situation, especially on rainy or snowy days. But now, you can make your bus safer. Install R.C.A.'s new rubber step treads built with a 2 1/2-inch wide abrasive strip insert. R.C.A.'s step treads are still channeled for water drainage and feet cling to the abrasive strip because of its physical "bite." R.C.A.'s step treads meet OEM specifications, ADA guidelines for color contrast and slip resistance, and industry standards.

Install R.C.A.'s new rubber step treads with abrasive strip, because this 2 1/2-inch strip helps feet safely reach their stop. For more information, call your local Blue Bird distributor.

ON at 100, OFF at 120		A2822-0B	A2822-0H	

HEAT SHIELD				
Use when manifold or turbo heat comes close to cord		HS1	HS1	

NOTES:

1. Use heat shield **HS1** on these applications.
2. Replacement cord is **not available**.
3. Use a tank-style heater—i.e., **TPS101t10-000** for these applications.
4. Must use the **flip cover** and **plug receptacle** with this cord design.
5. Installs in a threaded port in the oil cooler housing.
6. Installs in the second from the front freeze plug opening on right side of the block.

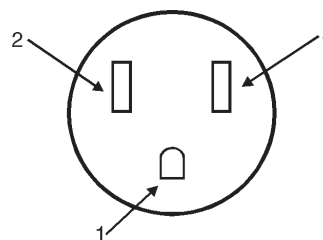

IF YOU CAN USE ONE OF THESE...

YOU'LL FIND THE HEATERS THAT NEED REPLACING BEFORE THE WEATHER TURNS COLD.

To check any engine pre-heater without having to plug the unit in, use a continuity tester in accordance with the accompanying diagram.

Using the power blades and the ground post, check **ALL 3** terminals to determine if the pre-heater is working.

Terminal to Terminal	If the Light Lights	If the Light Stay Out
