# RAP92382 ADAPTER KIT INSTRUCTION SHEET

## ADAPTER KIT FOR SINGLE WIRE WARNING SWITCHES

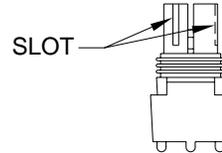

---

Step 1: Determine which connector is needed. If it is difficult to determine the color of the connector, the black Packard tower will have a slot on top of the "B" pin, while the gray Packard tower will have slot on the bottom of the "A" pin and also a slot on the right side of the "B" pin.

TOP OF BLACK PACKARD TOWER

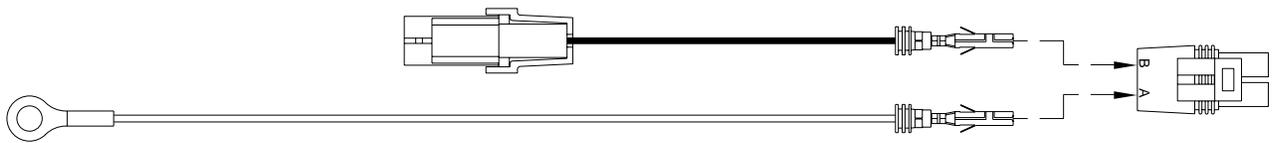

BOTTOM OF GRAY PACKARD TOWER

Note: The lettering is only on the top of the connector.

Step 2: Insert the black warning switch wire into the "B" pin and the white ground wire into the "A" pin, as shown.

Step 3: Close the locking latch on the bottom of the tower. Pull gently on the wires to assure the connector is latched.
