# **GENERAL**

**1999, 40' Wanderlodge LX**

## **Owner Delivery Process**

*The owners' delivery process is a service offered to owners taking delivery at the factory. It's purpose is to train the owner in the use of a Wanderlodge motor home by a factory trained professional.*

## **General Statement About Interior**

*Interiors will be oak wood which will consist of the following items. Walls will be wood or wallpaper. Cabinets will be wood (with the exception of the living room overhead cabinets which will be wrapped in vinyl).*

## **Fixtures**

*Switches/receptacles will be covered in wallpaper where applicable and matched as close as possible in other areas. Light fixtures and bath accessories will be gold colored or brass.*

## **Carpet**

*Carpet is standard for all areas of the coach except the bathroom and kitchen. In addition loose carpet mats are included to be used on the steps.*

## **Fire Extinguisher**

*Two dry chemical type extinguishers with a gauge are provided. One is located in the co-pilot area of the coach near the entrance door and another is located in an exterior compartment.*

## **Headliner**

*The headliner consists of individually wrapped panels attached to the ceiling substrate with panel clips. Each panel is wrapped with vinyl on one-fourth inch thick polyethylene foam. These panels are removable for replacement or repairs. These panels will be in the ceiling of the living area only. Ceilings of closets (with the exception of the rear walk-in closet), cabinets, etc. will have cargo type carpet glued in place. Two individual accent strips will be installed in livingroom and kitchen area.*

## **LPG Leak Detector System**

*The gas leakage detector sounds an alarm and closes down the main LPG supply in the event of an LPG leak. This unit does meet California requirements.*

# **GENERAL**

**1999, 40 Ft. Wanderlodge LX**

## **Smoke Detector**

*A smoke detector is installed in the ceiling of the main living area.*

## **Carbon Monoxide Detector**

*A carbon monoxide detector is installed in the living area.*

## **Windows**

*(4) living room, (1) dinette, (2) bedroom, and (1) kitchen  
Horizontal single sliding, aluminum sash windows with  
Spring loaded latches, 6% light transmission tinted,  
laminated glass.*

# **BATHROOM**

*1999, 40 FT. Wanderlodge LX*

## **Ceramic Tile, Bathroom Floor**

*12 inch x 12 inch ceramic tile is installed on the floor on a diagonal. Tiles from the Laufen Charleston series or Florida Tile's Natura Serene series will be standard. Other tiles selected will be billed for the difference.*

## **Fantastic Fan With Rain Sensor**

*A remote switch and removable cover are provided. The vent will automatically close when moisture is detected*

## **Lighting**

*Opera light or lights are provided (depending on floor plans) over vanity. These lights are 120 VAC. 12 volt ceiling lighting is also provided.*

## **Medicine Cabinet**

*The configuration of the cabinet is determined by the individual floor plan. Doors will have safety-backed mirrors. Interior will have adjustable shelves with anti-tip lips. A minimum of one 12 volt bullet light and one 120 VAC, GFI receptacle is provided.*

## **Shower Stall or Tub/Shower**

*The shower stall will have a fiberglass pan with nonskid bottom and color coordinated cultured marble walls with a built in soap dish.*

*Each will contain a stationary shower head with a personal shower wand on an adjustable slide bar.*

*A 12-volt DC ceiling light fixture is mounted in the ceiling.*

## **Toilet, Sealand**

*The china bowl Sealand toilet is standard. Two (2) rolls of dissolvable tissue are provided along with toilet chemical.*

## **Vanity Top and Bowl**

*The vanity top and bowl are a molded one piece cultured marble material. A gold colored single lever faucet is standard.*

## **Mirror, Full Length**

*Each bath arrangement will contain at least one full length mirror. Wardrobe doors will be mirrored.*

# ***BATHROOM***

***1999, 40 FT. Wanderlodge LX***

## **Accessories**

***Included in each unit are the following accessories:***

- (1) Toilet tissue holder***
- (2) Single towel bars***
- (1) double towel bars***
- (1) robe hook***
- (2) Towel rings***

# ***BEDROOM***

*1999, 40 Ft. Wanderlodge LX*

## **Bed Arrangement, Center Island, Standard**

*A 60" x 78" foam mattress tapered with 10" radius corners is standard. A quilted bedspread with a fitted skirt and a reverse flap (French flap) and day/night pleated shades are standard (standard selection). Two bed pillows are included. A fabric covered headboard to match the interior and a full width mirror behind the headboard is also standard.*

## **Audio Visual**

*A 20-inch remote control color cable ready television and an AM/FM cassette radio is standard in the bedroom.*

## **Lighting**

*Flourescent lighting is installed in the bedroom ceiling and 12 volt spotters with individual switches are mounted in the bottom of the cabinet directly over the head of the bed. Two ceiling spotters on each side mounted in the ceiling at the valances.*

## **Closet, Full Length Hanging**

*At least one full length hanging closet is standard in each floor plan. A 12 VDC light fixture in the ceiling of the closet is standard. Closet lighting is automatic when doors are opened. Swinging doors provide access.*

## **Night Tables**

*The night tables are a stained oak with solid surfacing material for tops with a brass insert.*

## **Storage, Under Bed**

*The 40 ft. Wanderlodge LX provides storage underneath the bed. This storage is accessed with the assistance of gas cylinders. This area is carpeted with the floor carpet selected for the remainder of the bedroom.*

## **Overhead Cabinet**

*A full length overhead cabinet is installed over the head of the bed.*

## **Window Boxes and Valances**

*Windows will have fabric covered window surrounds. Day/night shades are installed at these windows. Vista lights will be installed in the upper decorative portion. A light valance with 12 volt indirect lighting is installed above the window boxes.*

# **CHASSIS**

**1999, 40' Ft. Wanderlodge LX**

## **Air Brake System**

*This motor home is equipped with dual service air brake systems for front, rear, and tag axle brakes, with integral fail-safe operation; and manual/automatic rear spring (parking) brakes. The service brakes are completely independent systems, each including a reservoir and separate distribution lines and valves. The reservoirs are brought into operation each time the brake systems are brought into operation each time the brake treadle is depressed too slow or stop the coach. Reservoir pressure for each service brake system is monitored by a respective pressure gauge on the front panel; system failure(s) are indicated by low pressure readings, illumination of the low air lamp and sounding of a buzzer.*

*To compensate for normal lining wear, each brake system is individually self-adjusting.*

*If a failure occurs in the rear, the front service brakes and rear spring brakes provide braking action.*

*In the unlikely event a failure where both service braking systems are disabled, the rear spring brakes will apply automatically and bring the vehicle to a stop.*

*In addition to the above, a four-channel anti-lock brake system for the steer and drive axles and standalone single-channel anti-lock brake systems for the tag axle are installed. In the event one of the wheels begins to lock up under severe braking conditions, the anti-lock system will detect this situation and gradually remove air pressure from the brake chamber until the wheel begins to turn. This will help assure*

*smooth braking action and minimize a wheel lockup.*

## **Air Dryer, Compressed Air System**

*The air dryer unit collects and removes moisture and contaminants from the compressor air output before the air reaches the reservoirs. This unit is different from a reservoir drain or an after cooler in that it provides condensation in the system reservoirs. Note that each reservoir also has a long maintenance free life for air brake system components due to the removal of system contaminants.*

## **Air Schrader Valve**

*An air connection is provided in the engine compartment to allow the air system to be pressurized from a "shop" source without the necessity of starting the engine.*

## **Air Suspension**

*This motor home is equipped with air suspension bags which cushion the front, rear, and tag axles. Dumping these air bags when the vehicle is parked allow the rubber bumpers to come together and eliminate vehicle springiness. Switches in the driver's area control dumping and filling of the respective air bags.*

*A light in the driver's area illuminates to warn the driver that the system is dumped and not to drive the vehicle until the*

# **CHASSIS**

*1999, 40' Ft. Wanderlodge LX*

*suspension is inflated.*

## **Cruise Control, Integral w/Cummins - CELECT Plus**

*A drivers controlled speed control which is integral with the Cummins diesel engine control. Controls are located on the lower dash panel.*

## **Diesel Fuel 50 Gallons for Delivery**

*50 gallons of diesel fuel is installed in Fort Valley prior to delivery of a unit.*

## **Emergency Warning Triangle Kit**

*This kit includes (3) fold out, reflective, red triangles in a plastic case with instructions for use.*

## **Engine, Cummins 450 hp M11**

*Cummins 450 hp M11 engine. See Chassis specs in front of book for detail information.*

## **Fire Alarm, Automatic, Engine Compartment**

*This feature alerts the pilot of excessive temperatures in the engine compartment via sensors in the engine compartment and a visual and audible warning in the pilot's area.*

## **Engine Starting Remote**

*A separate switch is located in the engine compartment to allow the engine to be started from the rear in a service situation.*

## **Fuel Filter, and Water Separator, Racor**

*A Racor fuel filter, a water separator/preheater is incorporated in the diesel fuel supply line and processes the fuel supply for maximum purity. The fuel filter also includes a built-in pre heater which operates thermostatically from the 12 volt battery supply when the ignition is on. A water sensor lights the dash indicator when the water level in the filter bowl is high enough to require drainage.*

*The Racor gauge shows the condition of the Racor filter in terms of fuel line vacuum. High vacuum reading indicates when the filter element requires changing. This gauge is located in the pilot overhead dash.*

## **Fuel Tank, 175 Gallons**

*The diesel fuel tank is located cross ways just behind the front axle. A fuel gauge is located on the upper dash. Dual*

# **CHASSIS**

**1999, 40Ft. Wanderlodge LX**

*fuel fills, one on each side of the body.*

*Two tow hooks are located at the front of the coach.*

## **Heater, Engine Block**

*A 120-volt element that heats the water in the engine block. On/off operation is controlled by a switch located in the load center.*

## **Mud Flaps**

*Individual rubber mud flaps are installed at the rear of the front and rear tires.*

## **Hitch, Trailer, Receiver Type**

*10,000 pounds of towing capacity and 1,000 pounds tongue weight capacity receiver type hitch.*

## **Retarder**

*An engine retarding system is utilized and will provide two levels of engine braking capacity. (Jacob's Brake)*

## **Hitch, Trailer Draw Bar**

*Removable receiver type draw bar with a 2" diameter chrome hitch ball. The 2" ball provided is rated at 5,000 pounds.*

## **Tires**

*12R-22.5 PXZA Michlein tires. Polished aluminum wheels, 2 inner rear steel wheels, and stainless steels hubs and lug nut covers are standard.*

## **Trailer Plug**

*The female receptacle is installed in the rear of the coach and wired into the electrical system. The male portion is supplied loose in the coach for installation by the owner on the tow vehicle. The wiring is a five-wire system with separate signals for turn signals and brakes.*

## **Wheel Saver**

*A plastic wheel saver is located in an outside compartment. This disc is to be used when removing or torquing lug nuts on wheels.*

## **Hooks, Tow**

# ***ELECTRICAL***

*1999, 40 Ft. Wanderlodge LX*

## **Switch, 12V Coach Master**

*A 12 volt coach master switch is located on a switch panel next to the entrance door. This switch allows power to be shut off to all 12 volt circuits except as noted to conserve batteries.*

## **Switch, 12V Coach Battery Master**

*A 12 volt coach master switch is located in the engine compartment area. This switch allows power to be shut off for long term storage of coach.*

## **Alternator, 200 Amp**

*This unit is equipped with a 12-volt negative ground 200 AMP alternator.*

## **Antenna, TV, Power**

*The TV antenna is roof mounted and remotely rotated by a control located in the passenger side of the overhead dash.*

## **Batteries, Chassis, 12 Volt Maintenance Free**

*Two 12 volt 1075 CCA maintenance free batteries wired parallel produce power for starting the coach engine.*

## **Battery Charger, (1) 140 AMP**

*One 140-AMP battery charger (integral with the Trace 3000 inverter) operate when a source of 120 volts of AC is supplied either from shoreline or generator. The charger is connected to the coach batteries. The engine batteries may also be charged by enabling the auxiliary battery switch on the lower dash.*

## **Battery, Generator**

*A separate battery is installed for starting the generator.*

## **Batteries, House**

*The house battery system consists of (4) 4D gel cell batteries*

## **Split Battery Power System**

*Three separate systems above are provided. The coach battery system supplies 12 volt power for all interior items and exterior lighting. The chassis battery system provides power for the engine cranking and ignition. The two systems are tied together only by the auxiliary battery switch on the lower dash and when the alternator is charging. The generator battery provides power for the generator cranking and is charged by an alternator on the generator. A generator auxiliary battery switch is provided to permit cranking the*

# ***ELECTRICAL***

*1999, 40 Ft. Wanderlodge LX*

*generator in the event that the generator battery becomes discharged. This power is provided by the house battery system.*

## **Inverter, (1) 3000 Watt with Integral Battery Charger**

*One 3000-watt Trace inverter with an integral charger is located in the right rear compartment. The inverter will power all accessible outlets in the coach as well as the ice maker, televisions, microwave oven, opera light, and refrigerator as long as the power demand is below 3000 watts. There is one remote control panel for control and status of the inverter located adjacent to the pilot seat.*

## **Burglar Alarm System**

*An intruder alarm system protects entry doors. Microphone sound sensors detect glass breakage (located in various areas of coach). Panic switch located in a bedroom panel enable a siren at anytime. System is enabled with a small key chain wireless transmitter.*

## **Cable Connection & Cable for Cable TV**

*The coach includes a connection for cable TV hookup and a 25' coax cable.*

## **Chime, Door**

*An electronic door chime is located next to the copilot seat.*

## **Load Center**

*The load center is 50 amp capacity @ 240 VAC. The load center is located in the rear davenport area.*

## **Outlets, Land Line Phone**

*Two outlets are provided and are wired to the female plug in the left rear compartment. Outlets are on the wall next to living room table and near a bedroom night stand.*

## **Power Cords**

*Approved power cords are supplied with the coach for hookup to external power sources. Each cord has a ground pin which provides proper electrical system grounding. A storage shelf for power cords is provided in an outside compartment.*

# ***ELECTRICAL***

***1999, 40 Ft. Wanderlodge LX***

## **Spotlight**

***A remote control high intensity spot light with dual high output sealed beam lamp producing 200,000 candle power is installed on the roof and can be positioned horizontally or vertically. Controls are located in the pilot lower dash panel.***

## **Wiring, Cellular With Antenna**

***An antenna and wiring is supplied for the customer to hookup a cellular phone. The antenna is roof mounted. Wiring terminates in the driver's area.***

## **Safeline Alarm**

***An audible and visual alarm in the driver's area that is activated when the ignition key is turned on if the coach is connected to shoreline power.***

## **Polarity Indication Panel**

***An actual power line monitor located in the left hand rear compartment that monitors the AC voltage of both legs of the AC shoreline supply. The panel indicates reverse polarity or missing ground connections.***

## **Generator, 12.5 kW, Diesel Powered**

***The generator is driven by a 3 cylinder water cooled diesel engine and is located in an enclosed quiet box between the chassis frame rails at the front of the coach. The engine/generator set is mounted on a motorized roll out carriage using vibration isolators with a telescoping exhaust system.***

***The carriage is powered in and out of the compartment for service by a 12 volt electro-mechanical linear actuator. Starting/stopping of the generator may be controlled from one outside or two inside locations.***

- 1) From the dash***
- 2) From the kitchen galley panel***

***The generator has an alternator and 12 volt battery for cranking the generator. There is also an auxiliary generator battery switch on the dash that will permit starting the generator in the event that the generator battery becomes discharged. This cranking power is obtained from the house battery system.***

# ***EXTERIOR***

*1999, 40 Ft. Wanderlodge LX*

## **Air Outlet Auxiliary**

*An auxiliary air outlet from the chassis accessory air tank is located in an exterior storage compartment. An air hose and gauge is included.*

## **Awnings, Patio, Curb Side**

*A patio awning is included as standard. The awning will be color coordinated to the exterior.*

## **Base Color, Indian Silver**

*Indian silver is the standard base color. Any other base may be used if specified three weeks before line load at Wanderlodge.*

## **Bumpers**

*Bumpers are formed integral with the front and rear body sections and are supported with metal. They are painted to match the paint design.*

## **Handle, Assistance Entrance Door**

*The entry door assist handle is located on the exterior of the coach to the left of the door. The assist handle is a clear acrylic*

*handle which is lighted when the porch light is on. Assist handles are also located on the interior of the coach on each side of the step well.*

## **Horns, Air**

*Dual horns with covers are roof mounted, one on each side of the coach. Horns are activated by a foot switch in the driver's floor board.*

## **Lights, Landing, Left and Right Side**

*The 12 volt DC recess mounted lights are located at the front and rear of the coach on both sides. Switches are located on the lower dash.*

## **Light, Porch**

*One amber, double bulb fluorescent light is located on the door side of the coach. The light is operated by a switch on the entrance door control panel.*

## **Lights, Driving**

*Clear driving lamps are mounted stationary in the front bumper. The driving lights illuminate on high beam provided the corresponding dash switch is active.*

# ***EXTERIOR***

*1999, 40 Ft. Wanderlodge LX*

## **Lights, Parking, Rear**

*These lights operate when the vehicle is in reverse gear.*

## **Luggage Compartments**

*The luggage compartments are lined with carpeting on the floors and vertical walls. Luggage compartments include lights which are activated by the individual door switches. The doors are parallelogram type and are gas spring operated.*

## **Step, Entrance Door, Electric Operated**

*The electric operated entrance door step extends when the door is open and retracts when the door is closed. A rubber covering is over the entrance steps. A switch is provided on the copilot's panel which allows the step to remain in the extended position.*

## **Water Faucet, Exterior**

*An exterior water faucet is located in a road side holding tank compartment.*

## **Water Hook Up, Commercial**

*The water supply system is dual purpose and has a commercial water inlet connection that is located in the road side holding*

*tank compartment. Commercial water hook up can be used to supply all coach water system requirements in the campsite. Coach includes a quick disconnect for hooking up to commercial water.*

## **Water Hose**

*A 25 ft. Water hose is placed loose in an outside compartment.*

## **Water Filter**

*The replaceable carbon activated filter that cleans all water entering the coach is located in line after the commercial water hook up.*

## **Outside Water Compartment**

*An outside water compartment is provided on the road side of the coach.*

## **Windshield Wipers**

*Dual 2 speed electric intermittent wipers with non glare arms and blades are provided. Wiper arms are parallelogram. Wipers have a delay position with the delay control on the*

# ***EXTERIOR***

***1999, 40 Ft. Wanderlodge LX***

***lower dash. A washer fluid reservoir fluid reservoir fill is located in the road side front compartment.***

## ***Air Operated Lock for Entrance Door***

***An air operated lock is installed at the top of the entrance door for a tight seal. This lock engages automatically when the unit is put in drive and disengages when taken out of drive. An override switch is located on the driver's arm rest.***

## ***Electrical Access Panel***

***The electric access panel is located behind a door below the driver's side window.***

# ***Heating & Air Conditioning***

*1999, 40 Ft. Wanderlodge LX*

## **Air and Heat System, Automotive**

*The dash heat and air system are an HVAC system designed to meet the latest freon requirements. This unit provides the ability to mix heat and air to provide defrosting capability.*

## **Air Conditioner, Condensate Drains**

*Separate drain lines are provided for each air conditioning unit to route condensation from the roof to the ground through the body side walls.*

## **Ducted Roof Air Conditioner, W/Remote Thermostat and Heat Strips**

*Air conditioners and a wall mounted master thermostat is located in the dinette area to control all three units. Remote temperature senders are located in the pilot area, kitchen/dinette area, and bedroom. The air conditioners are operable from 120 VAC source (generator or shoreline power). Each AC includes heat strips.*

## **Freeze Protection**

*Additional insulation is installed in the outside water compartment along with heat from the Aqua Hot hot water heat system. via a 5000 BTU power convector on both sides of the holding tank compartment.*

## **Heat, Electric**

*An electric forced air heater is located in the bath, controlled by remote thermostat.*

## **Heat, Hydronic (Aqua Hot)**

*The diesel fired hydronic heating system consist of the following:*

- 1) Diesel fired boiler rated at 50,000 BTU with three zones (front, bath, & bedroom).*
- 2) Integral heat exchanger to provide hot water along with a heat exchanger that ties into the engine coolant to provide hot water, or engine preheat capability.*
- 3) Bay heat provides heat for the holding tank compartment with a low-temperature thermostat located in the bay area.*
- 4) The front zone is controlled by the heat side of the A/C thermostat and consist of a total of 30,000 BTU of power convectors.*
- 5) The bath zone consist of 10,000 BTU and is controlled by an individual thermostat located in that area.*
- 6) The bedroom zone contains 10,000 BTU and is controlled on the heat side of the A/C thermostat.*
- 7) The boiler also has a 1650 watt electrical heating element to provide heat during low demand period.*

# ***KITCHEN/DINETTE***

*1999, 40 Ft. Wanderlodge LX*

## **Cook Top, LPG**

*The two burner cook top is fueled by the coach LPG system. Unit includes an electronic ignition. A cook top cover is made of solid surfacing material (lift off lids).*

## **Counter Top**

*The counter top is made of a solid color solid surfacing material with brass accent trim.*

## **Cutlery Tray**

*A plastic tray is installed loose in a drawer in the kitchen base cabinet.*

## **Dinette, Table & Chairs**

*The dinette is a table made of solid surfacing material mounted on a cantilever leg. Two free standing chairs are covered in a material to match the interior.*

## **Dishtowel Rods**

*A dish towel rack is installed inside the kitchen base cabinet area.*

## **Floor, 12" x 12" Tile**

*A standard selection of 12" x 12" ceramic tile is installed in this area laid on a diagonal. Standard selections would be Laufen's Charleston series or Florida Tile's Natura Serene series.*

## **Galley Panel**

*The systems monitoring and control panel, is located in the kitchen base cabinet. This panel provides a convenient means of displaying potable water level, holding tanks, and LPG supply, as well as other functions listed below:*

- 1) Water pump switch w/indicator light - to indicate when power is being supplied to pump.*
- 2) Generator switch - controls the stop/start operation of the generator.*

## **Lighting**

*A 12 VDC light bar is mounted at the kitchen and dinette overhead cabinets, a 12 VDC thin-lite is mounted under the kitchen and dinette overheads.*

# ***KITCHEN/DINETTE***

*1999, 40 Ft. Wanderlodge LX*

## **Micro-Convection Oven**

*A 120 VAC micro-convection oven is mounted above the gas cook top and is powered by either shoreline, generator, or by the inverter. It includes a light under the microwave and a temperature probe and vent.*

## **Mirrors**

*Clear safety backed mirrors are provided on the wall behind and adjacent to the kitchen counter top.*

## **Pantry**

*A pantry either pull out or individual drawers is standard.*

## **Refrigerator/Freezer/Ice Maker**

*A Norcold four door refrigerator with built in ice maker is standard. The refrigerator operates on 120 volts from shoreline, inverter, generator, or on LP gas.*

## **Shades Day/Night**

*Day/night shades are installed on the windows inside trim. The shades are color coordinated to the interior color.*

## **Sink**

*A double bowl under mount solid surface material sink is standard. A single lever chrome faucet with spray attachment is included. Sink covers are standard.*

## **Waste Basket**

*A built-in basket is included under the kitchen base cabinet.*

# ***LIVING ROOM***

*1999, 40 Ft. Wanderlodge LX*

## **Window Boxes and Valances**

*Windows will have fabric covered window surrounds. Day/night shades are installed at these windows. Vista lights will be installed in the upper decorative portion. A light valance with 12 volt indirect lighting is installed above the window boxes.*

## **Companion Chairs**

*Standard chair or chairs (depending on floor plan) are Villa. Chairs are covered in a fabric and mounted on a swivel base.*

## **Lights**

*12 VDC fluorescent valance lighting is provided. 12 VDC halogen spotters are mounted in the ceiling.*

## **Sofa**

*An 82" Villa sleeper sofa is standard. Sofa is covered in fabric. Includes two throw pillows and two arm covers.*

## **Table or Tables**

*Living room table or tables are oak wood with a solid surface material on the counter top with .5" brass insert in the edge.*

## **Floor, Carpet**

*The living room floor is covered in a good grade of carpet.*

# ***MECHANICAL***

*1999, 40 Ft. Wanderlodge LX*

## **Leveling Jacks, Hydraulic, Automatic**

*Includes four hydraulic operated jacks. Controls for automatically leveling the unit in the campsite are located on the wall next to the driver.*

## **Tanks, Fresh Water, Approx. 100 Gallons**

*The tank is located in outside water compartment. The tank is non-pressurized type so that system water pressure is developed by a demand pump when not connected to commercial water. Tank is equipped with a two inch drain. The tank also includes level indicators.*

## **Tanks, Holding**

*Separate holding tanks for gray water and waste water are provided. Each holding tank has a separate drain valve, dumping gray water and waste through a common single discharge connection. The capacities are approximately 75/75.*

## **Fresh Water Manifold Distribution**

*A central manifold is located in the roadside luggage compartment. All hot and cold water is distributed to components by individual hot and cold lines from this central point. Each hot and cold line has an individual shut off located on the manifold.*

## **Water Pump**

*A factory calibrated pressure control switch is preset to turn the water pump on when the system pressure falls below 20 psi; and turns it off once pressure reaches 35 psi. Switches enabling the water pump is located on the galley monitor panel and in the bathroom.*

## **Winterizing Hook Up**

*A 3/4 inch female pipe thread connection is supplied for pumping RV antifreeze directly into the fresh water system. When the valve is closed to isolate the water purifier, you can fill the fresh water system from the water pump to the fixtures.*

## **CB Receiver Transmitter**

*Forty channel, CB receiver/transmitter is installed in the hood table with all controls in the hand held portion.*

## **Closed Circuit Television System**

*A black and white camera with a 1 lux or less sensitivity and a 7" black and white monitor which automatically operates when reverse gear is selected.*

# **MECHANICAL**

**1999, 41 Ft. Wanderlodge LXi**

## **Power Step Well Cover**

***An air powered step well cover retracts and extends from under the copilot's seat. In/out controls are located next to the copilot's seat.***

## **Light, Entrance**

***A 12 volt light is provided in the step well to facilitate entering or leaving the coach at dark. The light illuminates when the entrance step is in the extended position. A switch is provided on the entrance door panel which permits the light to be turned off if the step is left in the extended position.***

# **PILOT/COPILOT AREA**

*1999, 40 Ft. Wanderlodge LX*

## **Seat, Pilot**

*A Villa drivers seat is mounted on a six way adjustable power and swivel base with electrically operated lumbar support. This seat is covered in Ultraleather.*

## **Seat, Copilot**

*A Villa copilot seat is mounted on a six way adjustable power and swivel base with electrically operated lumbar support. This seat is covered in Ultraleather.*

## **Shades**

*Day/night shades are mounted on the drivers and door windows.*

## **Light, Map**

*A 12 volt bullet or map light are provided for both the pilot and copilot areas.*

## **Steering Wheel W/Tilt & Telescoping Column**

*Steering wheel is 20" diameter wheel upholstered in leather. Includes two flat black rally type spokes tapering below the center of the steering wheel. The steering wheel tilt control allows multiple positioning of the steering wheel in increments*

*of 7 degrees. Includes telescoping steering column which can be locked at infinite locations within its telescoping range of 2.25 inches.*

## **Stereo System**

*A tuner Cassette stereo system features direct access tuning, 24 channel preset memory, seek and manual tuning, Dolby B noise reduction, metal tape capability, and loudness switch. Included are four full range coaxial speakers in the front living area.*

## **Television, Front Overhead**

*A built in 20" stereo color TV. TV has remote control stereo MTS broadcast reception, audio video inputs, and is cable compatible. Due to Federal regulations this TV will not operate while in transit.*

## **VCR, Stereo**

*A stereo VCR is mounted in the front overhead.*

## **Video Selector Box**

*The video selector box is mounted in the front overhead cabinet. This switch permits independent switching of two VCRs, TV, TV cable, and TV game to the two standard TVs in the coach.*

## **Windshield Blind**

*A blind extends across the front windshield. Hooks are provided in the bottom of overhead to secure the blind while in transit.*

## **Visor, Sun**

*Pro-tec-tor sun visors are used for a variety of adjustments.*

## **Dual Mirror Control**

*Located in lower dash panel are two remote mirror controls. The controls to the left control the lower flat rear view mirror. The controls to the right control the upper convex (wide angle) rear view mirror. Each control provides full adjustment by the arrows on the switches.*

## 1999, 40' WANDERLODGE LX OPTIONAL FEATURES

31-Jul-98

| AREA       | OPTION NO. | DESCRIPTION   |
|------------|------------|---|
| BATH       | 9101       | <b>COMBO WASHER/DRYER.....</b><br>Combo washer/dryer is installed in closet area of bath with short hanging above. Shut off valves for hot & cold water are located below combo unit. 120VAC power is supplied by shoreline hookup or generator.  |
| BATH       | 9109       | <b>TOILET, MICROPHOR ELECTRIC.....</b><br>This option installs a vitreous china bowl toilet, ultra-low water use and 12VDC electric flush in lieu of standard Sealand.  |
| BATH       | 9132       | <b>PLUMB/WIRE FOR WASHER/DRYER.....</b><br>Plumbing and wiring only are installed for the combo washer/dryer.   |
| BEDROOM    | 9227       | <b>CROSS ISLAND BR W/WALK-IN CLOSET.....</b><br>This option installs cross island bed in lieu of center island. Overhead cabinet above head of bed and light valance lighting on opposite side. A walk in closet installs in rear davenport area. Includes mirrored pocket door, thin light in ceiling, and drawer cabinet on both sides of closet with hanging across rear back. Back wall is cedar lined. |
| DASH       | 9100       | <b>PREMIUM SOUND.....</b><br>A 10 disc CD changer is installed in cabinet area above windshield controlled by the radio in dash.  |
| DASH       | 9103       | <b>MUSICAL HORN.....</b><br>A PMMI musical horn is installed in dash area.  |
| ELECTRICAL | 9169       | <b>COMPASS, SYNTREK W/THERMOMETER</b><br>A Syntrek electronic compass with indoor/outdoor thermometer is installed in the dash.   |
